

HOLLAND ENGINEERING INC

STORMWATER RECERTIFICATION

Stormwater System 5 Year Inspections & Certifications

Multi-family residential and commercial properties are required to have their drainage systems inspected by a professional, licensed engineer every 5 years.

The inspections include;

- ✓ Catch basins, drainage manholes and piping
- ✓ Drainage retention areas and swales
- ✓ Drainage pipe outfalls
- ✓ Lake and canal banks
- ✓ Exfiltration systems
- ✓ Any system related to stormwater

- *Holland Engineering, Inc. is a professional civil engineering firm that provides the required stormwater inspections and certifications.*
- *Our staff of professionals will conduct a thorough inspection of your stormwater system and provide a written report of the findings. Our stormwater inspectors are certified through the State of Florida.*
- *If maintenance or repairs are needed, HEI will assist you in finding qualified contractors to perform the work.*
- *We then reinspect your system after the repairs have been completed.*
- *Holland Engineering, Inc. provides a letter of certification that is required to obtain your stormwater license renewal.*
- *Holland Engineering, Inc offers competitive pricing and can meet your schedule.*
